SYLLOGEUS is a publication of the Canadian Museum of Nature, designed to permit the rapid dissemination of information pertaining to those desciplines and educational functions for which the Canadian Museum of Nature is responsible. In the interests of making information available quickly, normal publishing proceedures have been abbreviated.

Articles are published in English, French, or in both languages, and the issues appear at irregular intervals. A complete list of the titles issued since the beginning of the series (1972) and individual copies of this number are available by mail from the Canadian Museum of Nature, Direct Mail Section, P.O. Box 3443, Station D, Ottawa, Ontario, Canada K1P 6P4.

Syllogeus Series No. 66
(c) Canadian Museum of Nature (1991)
Printed in Canada

La collection SYLLOGEUS, publiée par le Musée canadien de la nature, a pour but de diffuser rapidement le résultat des travaux dans les domaines scientifique et éducatif qui sont sous la direction du Musée canadien de la nature pour assurer la prompt distribution de cette publication, on a abregé les étapes de la rédaction.

Les articles sont publiés en français, en anglais ou dans les deux langues, et ils paraissent irrégulièrement. On peut obtenir par commande postale la liste des titres de tous les articles publeés depuis le début de la collection (1972) et des copies individuelles de ce numéro, au Section des commandes postales, Musée canadien de la nature, C.P. 3443, Succursale D, Ottawa, (Ontario) Canada K1P 6P4.

Série Syllogeus No. 66
(c) Musée canadien de la nature (1991)
Imprimé au Canada

Text pages printed on paper containing recycled fibre.
Les pages du texte sont imprimés sur un papier contenant des fibres recyclés.

A Bibliography of Mustelids: Part IX: European Mink

Phillip M. Youngman[1]

1991

Syllogeus No. 66

[1]Paleobiology Section, Canadian Museum of Nature, P.O. Box 3443, Station D, Ottawa, Ontario, K1P P64

Introduction

This is the ninth of a series of bibliographies on mustelids. Previous parts were published by Michigan State University under the editorship of Richard J. Aulerich. This list of publications is limited to the literature on the European Mink, *Mustela lutreola* (Linnaeus, 1761) from 1549 to the present (cut-off date 31 October 1990). I have included the bulk of the literature on this species, however a relatively large number of early publications have been impossible to obtain for verification though they are included.

The criterion for inclusion is that a publication, or thesis, mentioned the European Mink, no matter what the context. Most of the incomplete citations in the Russian language are from Novikov, 1939. A number of references were not seen by me, a number are incomplete. It would be appreciated if readers noting omissions and errors would send me new or corrected citations (preferably typed), and new papers as they are published. I will attempt to make revisions available on disk, or print-out, on request.

References are listed alphabetically by senior author. Titles of publications transliterated from the cyrillic alphabet are enclosed in brackets.

This bibliography is being published with the hope that it may assist studies of this interesting rare and endangered carnivore.

For comments, corrections and additions, I am grateful to Drs. I. Héran, D. Mirić, D. Murariu, O. Rossolimo, A.L. Ruprecht, N. Spassov, M. Stubbe, and Michel Tranier. The cover design by V.M. Smirina is from Ternovskii, 1975. I thank Gail Rice and Joanne Dinn for typing the manuscript.
